

FLUORESCENT

LEAK DETECTOR

Suitable for use on all types of gas lines, piping, valves, joints, fittings – especially refrigerant. A positive medium for detecting leaks at pipe joints carrying most any kind of gas. Not for use on oxygen lines. **VISI LEAK LEAK DETECTOR** will indicate leaks by forming bubbles at the point of even the most minute leak. A superior foaming agent, not a soap solution. Contains no corrosive ingredients. Non-Hazardous, Non-Toxic, Non-Corrosive, Non-Staining and Non-Freezing. Performs well on hot or cold pipelines and within a temperature range of -30° to 200°F. Fluorescent color makes it easy to see the bubbles indicating a leak. Bubbles have staying power, even on vertical surfaces, allowing for extra inspection time.
